

Mobile boot washing machine

Hygiene on site

The mobile boot-washing roll container is an indispensable component of modern hygiene concepts at deployment sites, enabling the efficient and safe cleaning of contaminated boots directly on site. In compliance with the guidelines of the DFV and AGBF, the roll container allows effortless removal of the boot washing system, while the integrated three-stage wastewater filtration system reliably filters out hazardous substances and safely drains the cleaned wastewater, thereby minimizing the risk of contamination spread.

Especially when dealing with hazardous and noxious substances, this mobile solution ensures a clean and health-friendly use of personal protective equipment. Additionally, thanks to the integrated hand brush, other pieces of equipment can also be thoroughly cleaned. Optionally, the boot washing system can be expanded with useful elements such as a towel holder, disinfectant dispenser, and a washbasin to further optimize the hygiene standard.

Mobile boot washing machine

Technical design

Trolley in accordance with DFV (German fire brigade association) and AGBF (association of the chiefs of professional fire brigades) guidelines

Powder-coated housing

Removable boot washing machine with sole and shaft cleaning brushes, additional hand-held washing brush and drip tray

3-stage sewage water filtration (200 μ , 50 μ and 1 μ)

Water and sewage water connection, Storz D coupling

Water and sewage water hose for connection to the trolley with filtration system

Hose reel with 15m water supply hose, Storz D coupling and hose reel with 15m sewage water hose, Storz D coupling

Dead man's brake (handle: pull-type) in accordance with DFV and AGBF-guidelines

Power connection 230V

Optional addition of a towel rail and/or washbasin

Trolley acc. to DFV and AGBF guidelines

Removable boot washing machine

Sole and shaft cleaning brushes

Additional towel rail + washbasin optional

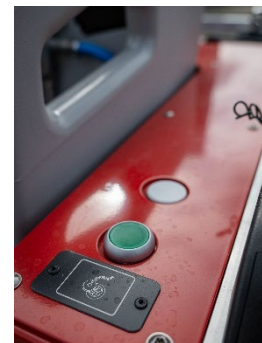

3-stage sewage water filtration

2 hose reels with water and sewage water hose

Dead man's brake (pulling)

Easy to use
